

HENA FIRDOS

Software Engineer — Full Stack Engineer

officialhenafirdos01@gmail.com — +91 9039181430 — Bangalore, Karnataka — LinkedIn — GitHub — Portfolio

Summary

Software Engineer specializing in Generative AI and full-stack development, with hands-on experience building LLM-powered applications using Python, FastAPI, React.js, and LangChain. Built and shipped two production-style AI applications integrating vector search and prompt engineering to automate code review and interview preparation workflows. Oracle-certified in Generative AI, seeking a Software/AI Engineer role to build scalable, user-facing AI products.

Technical Skills

Programming Languages: Python, C++, Java, JavaScript, TypeScript, SQL

AI & GenAI: LLMs, Prompt Engineering, LangChain, RAG, Vector Databases, Embeddings, OpenAI API

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: FastAPI, Node.js, Express.js, REST APIs, JWT Authentication

Database: PostgreSQL, MongoDB, SQL

Tools: Git, GitHub

Core Computer Science: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, SDLC

Projects

AI-Powered Code Reviewer | *React.js, TypeScript, FastAPI, LangChain*

Feb 2025

- Built a full-stack AI code review tool that analyzes submitted code and returns bug flags and quality suggestions in under 3 seconds per file, tested across 50+ Python/JS snippets.
- Integrated LangChain with vector embeddings (semantic search over a 500+ snippet knowledge base) to improve suggestion relevance and reduce false positives.
- Built secure REST APIs with JWT authentication, supporting concurrent multi-user sessions between frontend and backend.
- Containerized with Docker using a modular service architecture, cutting local environment setup time from 30 minutes to under 5.

GenAI Job Preparation Platform | *React.js, TypeScript, FastAPI, LangChain*

2026

- Developed a full-stack AI platform that parses resumes and generates ATS compatibility scores plus 10+ tailored interview questions per role in under 5 seconds.
- Implemented prompt engineering pipelines to generate personalized feedback and career recommendations, validated against 30+ sample resumes across 3 job domains.
- Built responsive REST-integrated React components with optimized async state management, keeping UI interactions under 200ms.
- Deployed via Docker with a reusable component architecture, speeding up integration of repeat UI patterns.

Experience

Cognifyz Technologies

Nov 2024 – Feb 2025

C++ Development Intern

Remote

- Built 5+ C++ applications applying OOP principles (inheritance, polymorphism, encapsulation, file handling), reducing repeated logic across modules.
- Applied Data Structures Algorithms to optimize application logic, resolving 15+ logic/debugging issues during development.
- Collaborated using Git across a small team, completing 10+ peer code reviews and following structured development practices.

Education

Technocrats Institute of Technology

Sep 2022 - Jun 2026

B.Tech in Computer Science - AIML (CGPA: 8.42/10.00)

Bhopal, MP

Certifications

- Oracle:** Generative AI Professional & AI Foundations Associate (2025)
- JPMorgan Chase & Co.** Software Engineering Job Simulation
- 5-star Python rating on HackerRank — 30+ GitHub repositories
